

Learning curves (mean and 10th-90th percentile interval over seeds)

black dots: steps where LN and no LN differ (Welch's t-test, $p < 0.05$, uncorrected)

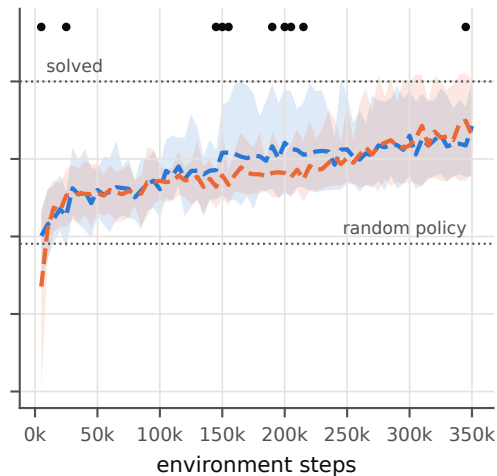

DDPG

LN vs no LN: Welch $p = 0.629$, Bonferroni $p = 1.000$

— no LN (n = 20) — LN (n = 20)

TD3

LN vs no LN: Welch $p = 0.348$, Bonferroni $p = 1.000$

- - no LN (n = 20) - - LN (n = 20)
